Old Oaks in Turkey - an Unknown Treasure

Monday, October 24, 2016
19:00

Nicklas Jansson is a biologist from southern Sweden combining a work at the nature conservation unit, County Administration Board of Östergötland, with research and teaching at the Biology Department at Linköping University. His field of study is mainly the insect fauna living on old trees, and the last 10 years he has focused on the oaks of Turkey. The project deals with the Mediterranean part of Turkey. Turkey is the richest country in Europe and around the Mediterranean sea, both for oaks (18 species) and for the beetles studied. An unknown diversity and many new species to science have been found during the project.

For attendance, registration at helins@sri.org.tr is necessary
Refreshments will be served after the lecture
